

# Your 2015 Year-End Summary

Dear Bob Johnson,

Thank you for being our valued customer. For your convenience, we've prepared this year-end summary of your energy use along with top tips for saving energy in your home. We hope you'll find it helpful. Please feel free to call us at 800.123.4567 with any questions.

## Here's where your energy dollars are going:

## Here are some easy tips and recommendations to lower your energy costs in your home:

- Set your thermostat at 78°F in the summer and 68°F in the winter and leave it alone. With each degree decrease on your thermostat in the winter and increase in the summer, you can immediately realize a 3 to 4 percent decrease in energy use.
- Install and preset an ENERGY STAR® programmable thermostat to automatically reduce energy usage when you are away or sleeping. Constantly changing the temperature causes your system to work harder.
- Turn down your water heater thermostat. A setting of 120°F is fine for most homes.
- Take quick showers instead of baths. This greatly reduces the amount of hot water used.
- Use ENERGY STAR® qualified compact fluorescent light bulbs (CFL) or LED light bulbs. They use three-quarters less electricity, generate 75 percent less heat and last up to 10 times longer than standard incandescent lighting.
